CLUB LINE

CL

THE SLIDE SELECT SYSTEM

The most talked about feature of the Club Line, the **Slide Select System**, eliminates guide rods and selector pins, requires less maintenance, and has a smoother function than a traditional selectorized machine. It also features a built-in smaller weight adjustment in five pound increments on the two hundred and three hundred pound systems. Finally, with no clanging weights, the Slide Select System is much quieter than the traditional weight stack resistance system.

The new CLUB LINE from HOIST Fitness offers a smaller, quieter option to owners looking for more space in their facility with the premium equipment that only HOIST Fitness can offer.

Compared to six major competitors, the original 8 CLUB LINE units take up 8-25% less floor space per machine, leaving more room for facilities to utilize. Competitors also have machine profiles that are 8-27% taller, significantly obstructing and cluttering views.

Each unit has a convenient accessory tray for keys, a phone, and water bottle as well as easy weight selection from a seated position.

"The Club Line has a very naturally smooth and consistent feel across the line. And I like the dampening feeling after completing a rep with no crashing weight stacks. Also, the Slide Select System is completely unique and easy to use"

HOIST Custom Artwork

Shield Wraps and Logo Decals

HOIST Fitness is pleased to offer custom designed shield wraps for Club Line equipment to brand the units to your facility's unique style. Designed to complement the elegant CL shields, wraps can be customized for the front and back of each piece.

To best assist the designer in creating your custom artwork, please provide frame and upholstery colors for the units being ordered and art direction such as branding guidelines or a website that can be used as a basis for your design. If you would like to have a matching logo decal created with your shield wrap, please specify that when ordering.

ARTWORK SPECIFICATIONS:

Vectorized artwork is the preferred format, be it a logo or graphic, as this can be scaled to any size without loss of quality to the artwork.

Vector Artwork File Types: .EPS, .PDF, .AI

All other artwork must be provided at 300 DPI and at the minimum dimensions to fit into the chosen shield size. Active artwork is preferred in order to properly set the artwork to the proper size and angle. Outlined fonts are requested if fonts files are not provided.

Editable Artwork File Types: .PSD, .PDF

DISCLAIMER PLEASE READ CAREFULLY: Actual frame and upholstery colors may differ from printed color samples and mock-ups shown. These mock-ups should be considered reference only. Due to the printing materials and method used, colors are subject to variation and color matching cannot be guaranteed. To help us match colors as closely as possible, please provide specific CMYK color codes per each color required and be advised that Neon colors are not available.
